available for all motors. 1/2" NPT
and metric sizes.

Available from 1/6 - 5HP in TEFC Nema
1/2 - 1HP TENV Nema
C face round body or C face with feet

PREMIUM EFFICIENT
on motors 1HP and up.

Special SS flinger to
protect the drive end
seal. IP69K required

Extremely Low Running
Surface Temperature

Internal O-rings on both drive end
and non drive end bells provide a
complete seal for IP69K
protection

New Stainless steel
cooling fan for simple
cleaning and
maintenance.
Made to withstand
high pressure
washing.

What is IP69K

The IP69K rating provides protection against the ingress of dust and high temperature, high pressure water. Making products with this certification ideal for use in industries such as food processing, where hygiene and cleanliness are paramount.

To obtain the IP69K rating the product **will withstand water pressure of between 1160-1450 psi, at a temperature of 176°F/80°C. IP69K rating is the highest protection available.**

What Are the Advantages of IP69K

In environments that require heavy washdown, the combination of water, chemicals, high pressure and temperatures can prove fatal for certain equipment. The IP69K rating offers complete assurance that the piece of equipment that has undergone this test conforms to the highest protection rating on the scale.
