Triple-lip seal

Features

Better dustproofing and waterproofing ensure a longer bearing life.

Tri-Ply Seal ball bearings are designed for environments where severe contamination is present, especially in agricultural equipment. Tri-Ply seals are a one-piece design that incorporates three seals molded to a shroud cap. This combination provides excellent protection against contaminants and prevents the loss of lubricating grease. This special seal ensures a longer service life.

Sealing device

The rubber seal extends to the outer circumference the shielded plate for better sealing performance, and prevents contamination of the bearing by dust or foul water.

Sealed plate

Galvanized steel plate construction ensures improved corrosion resistance. Optimal design contributes to enhanced pressure resistance.

Triple-lip

Provides excellent dustproofing and waterproofing, thus protecting against contamination by dust or foul water.
